

EVIDENCE LEDGER

Dr. Amara N. Okonjo

Co-founder & Chief Technology Officer · Northlane Systems Inc.

PREPARED FOR	Sample - evifound.com
REPORT DATE	14 February 2026
COMPANY	Northlane Systems Inc. · Ontario, Canada
JURISDICTION	Canada, Nigeria, United States
INPUTS	Pitch deck, founder-provided resume, founder-provided profile links, founder-nominated references
NAME CONFIDENCE	Confirmed - the founder submitted their legal name; all name-dependent checks ran against it

Checked: 13 · Not Checked: 2

What the verdicts mean

VERIFIED Supporting evidence was found through the available checks.

FLAGGED The checks found information that may warrant investor attention.

UNAVAILABLE The check could not be completed, usually because the required information wasn't available.

PENDING The check has not been completed yet (for example, a reference request awaiting the referee's response).

This report is not a guarantee of accuracy and is not investment advice. See the full disclaimer at the end of this report.

SECTION 1 · BACKGROUND, FINANCIAL, REGULATORY RISK CHECKS

Background, financial, and regulatory risk checks for this founder

Founder PEP screening

VERIFIED

- ✓ Level 1 (score 100) - heads of state, senior government officials, supreme court judges
- ✓ Level 2 (score 80) - members of parliament, ambassadors, senior military leaders
- ✓ Level 3 (score 70) - regional and local government officials, mayors, judges
- ✓ Level 4 (score 55) - lower-level officials and political party members
- ✓ Relatives and Close Associates (RCAs) of PEP individuals
- ✓ Special Interest Persons (SIP) - individuals with government influence
- ✓ Special Interest Entities (SIE) - companies with government ties
- ✓ High-profile businesspersons with potential exposure

Comprehensive - global, multi-level PEP detection including family, close associates, and state-influenced entities.

No politically exposed person match at any level, and no relative or close associate match.

DIDIT - PEP SCREENING

Global watchlist screening

VERIFIED

- ✓ OFAC SDN (US Treasury Office of Foreign Assets Control)
- ✓ United Nations Security Council consolidated list
- ✓ EU consolidated financial sanctions
- ✓ HM Treasury (UK)
- ✓ Interpol Most Wanted
- ✓ FBI Most Wanted
- ✓ Government exclusion and debarment lists
- ✓ Enforcement actions from multiple jurisdictions

Comprehensive - global and international. Covers all major sanctions and law enforcement lists worldwide.

No match on international watchlist or law-enforcement databases.

DIDIT - GLOBAL WATCHLISTS

Identity verification

VERIFIED

- ✓ Confirms the person exists and the ID is valid
- ✓ Cross-references government and credit bureau databases
- ✓ Canada: credit bureau / FINTRAC matching (name + DOB + address)
- ✓ Other countries: national ID registries where available

Coverage varies by country - Canada uses credit bureau / FINTRAC; many countries have no database validation available.

Government ID verified and matched to the founder's submitted legal name, date of birth and residential address.

Liveness and document authenticity passed.

DIDIT - IDENTITY VERIFICATION

Regulatory & Securities Enforcement

VERIFIED

- ✓ Regulatory warnings, fines, and enforcement actions
- ✓ Securities regulators, central banks, and financial authorities worldwide
- ✓ 175+ sources across 168 countries
- ✓ US SEC, Canadian Securities Administrators (Investor Alerts), Brazil CVM
- ✓ UK FCA, EU ESMA, Germany BaFin, France AMF, Netherlands AFM, Switzerland FINMA
- ✓ Italy CONSOB, Spain CNMV, Cyprus CySEC
- ✓ Japan FSA, MAS Singapore, Hong Kong Monetary Authority, China CSRC, India SEBI, Australia ASIC
- ✓ South Africa FSCA, Kuwait CMA, Jordan JSC, Morocco AMMC, Uganda CMA, Zambia SEC, Bahamas SC and others
- ✓ IOSCO Investor Alerts Portal

Global - 175+ regulatory sources across 168 countries. Covers securities regulators, central banks, financial intelligence units, antitrust authorities, and procurement registries worldwide.

No regulatory warning, fine, enforcement action or investor alert returned across the searched regulators.

SOURCE EVIDENCE

SEC EDGAR: <https://www.sec.gov/cgi-bin/browse-edgar>

DIDIT - REGULATORY ENFORCEMENT DATABASES

Sanctions list screening

VERIFIED

- ✓ OFAC (US) sanctions list
- ✓ UN Security Council consolidated list
- ✓ EU financial sanctions & travel bans
- ✓ UK HM Treasury sanctions
- ✓ Development-bank debarment lists - World Bank, ADB, AIIB, IDB, AfDB, EBRD, EIB, CDB
- ✓ Interpol Most Wanted & FBI Most Wanted
- ✓ IOSCO investor alerts
- ✓ EU Air Safety List

Comprehensive - global and international. Covers all major multilateral sanctions and debarment regimes.

No match on any searched sanctions or debarment list.

SOURCE EVIDENCE

OFAC SDN: <https://sanctionssearch.ofac.treas.gov/>

DIDIT - SANCTIONS LISTS

US/UK background & financial-database screening

VERIFIED

- ✓ Interpol Most Wanted
- ✓ FBI Most Wanted
- ✓ Financial crime records - fraud, corruption, drug trafficking, bribery
- ✓ Global and local criminal databases

Covers criminal records that appear on watchlists, law enforcement, and regulatory databases - not every local police record worldwide.

No criminal, financial-crime or law-enforcement record returned for the confirmed legal name across the searched US and UK databases.

DIDIT - BACKGROUND & CRIMINAL DATABASES

Founder bankruptcy & insolvency

VERIFIED

- ✓ Bankruptcy, insolvency, and liquidation proceedings registers
- ✓ National bankruptcy boards
- ✓ Deposit insurance corporations
- ✓ Court insolvency monitors
- ✓ Multiple jurisdictions covered

Global - multi-jurisdiction insolvency registers.

No personal bankruptcy or insolvency proceeding found in the searched registers.

DIDIT - INSOLVENCY REGISTERS

Founder fitness & probity

VERIFIED

- ✓ Financial regulator fitness & probity registers globally
- ✓ Individuals assessed as unfit for financial-services roles
- ✓ Bars and disqualifications from holding regulated positions

Global - financial regulatory bodies worldwide.

No fitness-and-probity finding, bar or disqualification returned by the searched regulators.

DIDIT - FITNESS & PROBITY REGISTERS

Press & public coverage

VERIFIED

Searches press and web coverage naming the founder or company.

Three independent press items name the founder in connection with Northlane Systems.

Northlane Systems raises seed round for grid-edge battery analytics

TechCrunch

14 March 2024 · Named as co-founder and CTO

Reports a \$2.0M seed round led by Halden Ventures. The founder is quoted describing the company's state-estimation approach.

<https://techcrunch.com/2024/03/14/northlane-systems-seed>

Ontario utilities pilot AI battery dispatch

The Globe and Mail

2 October 2024 · Named as technical lead on the pilot

Describes a 14-month pilot with two Ontario distribution utilities. Consistent with the founder's stated employment period.

<https://www.theglobeandmail.com/business/article-ontario-utilities-ai-battery>

The engineers rebuilding the grid's software layer

IEEE Spectrum

19 January 2025 · Interview

Long-form interview. Claims made in the interview about deployment scale match the pilot reporting above.

<https://spectrum.ieee.org/grid-software-layer>

WEB & PRESS

Founder adverse media

UNAVAILABLE

- ✓ International news articles and reports naming the individual
- ✓ Financial crime - fraud, money laundering, corruption, tax evasion
- ✓ Narcotics / drug trafficking, terrorism & terrorist financing
- ✓ Regulatory violations
- ✓ 415+ risk tags with sentiment analysis across multiple languages

Global - international news sources, multiple languages, 415+ risk categories.

One adverse-media match was returned on name similarity alone. It concerns a different individual of the same name abroad and was not attributed to this founde...

DIDIT - ADVERSE MEDIA

Funding claim - Form D

UNAVAILABLE

Checks SEC filings for a previously reported raise.

No confirming source found.

SEC EDGAR: <https://www.sec.gov/edgar/search/>

SEC EDGAR

SECTION 2 · IP VERIFICATION AND PUBLICATIONS

Patent, trademark and publication searches, reported with IP-specific statuses

IP Verification searches public intellectual property records - patents and trademarks - for records associated with the founder's confirmed legal name. Evifound checks United States and selected international registries, then matches and consolidates results across sources to reduce duplicate records and name-only false matches. Each record is reported exactly as published, including the owner or assignee of record. The search is evidence gathering, not a legal opinion, a confirmation of ownership, or a statement about the founder's relationship with any organisation named on a record.

WHAT WAS CHECKED

- Patent and trademark records associated with the founder's confirmed legal name
- Inventor, applicant and owner names, and identity consistency
- Owners and assignees exactly as published on each record
- Filing, publication and registration information
- Record identifiers, status, jurisdiction and classifications where available
- Duplicate records across sources, consolidated
- Recorded United States patent assignment transactions for the patents identified
- Academic publications and citations from Semantic Scholar and Google Scholar, de-duplicated and matched to the founder's name and field
- Source provenance for every record shown

Patent records

- ✓ Patent records across the United States, Canada, China, WIPO and India
- ✓ Google Patents
- ✓ Inventor, assignee, publication and filing information where available
- ✓ Results consolidated across sources
- ✓ Name / identity consistency review

STATUS · RECORDS FOUND

SCOPE

Founder-level + Company-level

United States, Canada, WIPO PCT, China and India registries were queried. Records were consolidated across sources to remove duplicates.

SEARCHED

- Founder legal name - "Amara Nneka Okonjo"
- Company legal name - "Northlane Systems Inc."
- Inventor name
- Applicant name
- Assignee name

SOURCES ACTUALLY SEARCHED

USPTO · Google Patents · Canada CIP0 · WIPO Patentscope · China CNIPA · India IPO

Two granted patents and one pending application list the founder's confirmed legal name as an inventor.

US 11,482,309 B2 - Distributed state estimation for grid-edge storage

Owner/assignee on the published record: Northlane Systems Inc.

Filed 8 Feb 2021 · Published 25 Oct 2022 · Granted · Jurisdiction: United States (USPTO) · Inventors: A. N. Okonjo; R. Tsuruoka

Inventor name matches the founder's confirmed legal name in first-and-last position. Consolidated with the equivalent Google Patents record.

USPTO: <https://patents.google.com/patent/US11482309B2/en>

Google Patents: <https://patents.google.com/patent/US11482309B2/en>

CA 3,142,880 C - Battery dispatch scheduling under uncertainty

Owner/assignee on the published record: Northlane Systems Inc.

Filed 19 Nov 2021 · Published 3 Jun 2023 · Granted · Jurisdiction: Canada (CIP0) · Inventors: A. N. Okonjo
Canadian counterpart of the US family above; deduplicated against the WIPO record.

Canada CIP0: <https://brevets-patents.ic.gc.ca/opic-cipo/cpd/eng/patent/3142880/summary.html>

WO 2024/118342 A1 - Federated forecasting for distribution networks

Applicant on the published record: Northlane Systems Inc.

Filed 1 Dec 2023 · Published 6 Jun 2024 · Pending · Jurisdiction: WIPO PCT · Inventors: A. N. Okonjo; M. Delacroix

Application is pending; no grant has been recorded in any searched registry.

WIPO Patentscope: <https://patentscope.wipo.int/search/en/WO2024118342>

SOURCE EVIDENCE

USPTO: <https://patft.uspto.gov/>

Google Patents: <https://patents.google.com/>

Records are reported exactly as published. The owner or assignee shown is the owner of record on the published document and is not a statement that the founder owns, controls or is affiliated with that organisation.

USPTO

Patent overlap screening

- ✓ Global patent candidates via technical search phrases from the preferred company deck
- ✓ Factual source records for later technical analysis
- ✓ Not a similarity or legal conclusion

STATUS · RECORDS FOUND

SCOPE

Technology-level screening

Search phrases were derived from the technical layer of the founder-provided deck. 41 candidate records were retrieved and reviewed.

SEARCHED

- Search phrase - "distributed state estimation battery storage"
- Search phrase - "federated load forecasting distribution feeder"

SOURCES ACTUALLY SEARCHED

Google Patents

41 candidate records retrieved; 3 nearest records reviewed in detail. No record disclosing the same claim combination was found.

US 10,879,704 B2 - Distributed energy resource state estimation

Assignee of record: Verdant Grid Technologies LLC

Granted 29 Dec 2020 · Adjudication: NOT_RELEVANT

Overlaps on the general problem of state estimation but relies on centralised telemetry, not the federated approach described in the founder's materials.

Google Patents: <https://patents.google.com/patent/US10879704B2/en>

EP 3 712 044 B1 - Battery scheduling in low-voltage networks

Assignee of record: Netzwerk Energie GmbH

Granted 17 Aug 2022 · Adjudication: UNCERTAIN

Partial overlap on dispatch scheduling under uncertainty. Claim scope differs; recommended for counsel review before filing in

the EU.

Google Patents: <https://patents.google.com/patent/EP3712044B1/en>

SOURCE EVIDENCE

Google Patents: <https://patents.google.com/>

This is an evidence-gathering screen, not a freedom-to-operate opinion or a legal similarity conclusion.

GOOGLE PATENTS

Trademark records

- ✓ Public trademark registries searched for the founder's name
- ✓ Each record's owner of record reported exactly as published

STATUS · RECORDS FOUND

SCOPE

Founder-level + Company-level

SEARCHED

- Founder legal name - "Amara Nneka Okonjo"
- Company legal name - "Northlane Systems Inc."

SOURCES ACTUALLY SEARCHED

USPTO TSDR · Canada CIPO · TMview

One live registered trademark and one pending application were located for the searched names.

NORTHLANE - Reg. No. 7,014,882

Owner of record: Northlane Systems Inc.

Filed 4 Apr 2022 · Registered 12 Sep 2023 · Live · Class 009, 042 · Jurisdiction: United States (USPTO)

USPTO TSDR: <https://tsdr.uspto.gov/#caseNumber=7014882>

NORTHLANE GRIDSENSE - Serial No. 98/441,203

Owner of record: Northlane Systems Inc.

Filed 22 Feb 2024 · Pending examination · Class 042 · Jurisdiction: United States (USPTO)

USPTO TSDR: <https://tsdr.uspto.gov/#caseNumber=98441203>

SOURCE EVIDENCE

USPTO TSDR: <https://tsdr.uspto.gov/>

Owners are reported exactly as published. This is not a statement that the founder owns or controls the organisation named as owner of record.

USPTO

Publications

Searches Semantic Scholar and Google Scholar for academic publications, consolidates duplicate records across both sources, and attributes a paper only when every part of the author name aligns with the founder and the subject matter fits their stated field.

STATUS · RECORDS FOUND

SCOPE

Founder-level

SEARCHED

- Founder legal name - "Amara Nneka Okonjo"

SOURCED FROM FOUNDER-PROVIDED INFORMATION (RESUME + LINKEDIN ANALYSIS)

SECTION 4 · REFERENCES

Founder-nominated references

These referees were nominated by the founder and wrote in their own words. Reference letters are testimony, not verification - evifound did not independently verify these statements.

Dr. Rina Tsuruoka

RECEIVED

RELATIONSHIP: ACADEMIC · UNIVERSITY OF TORONTO

R.TSURUOKA@EXAMPLE.EDU

RECEIVED FEBRUARY 13, 2026

I supervised Amara's doctoral work between 2014 and 2019. The technical claims described in the company's materials are consistent with the work she completed here, and she was the principal author on the state-estimation line of research. I have no financial interest in the company.

Marc Delacroix

RECEIVED

RELATIONSHIP: PROFESSIONAL · NORTHLANE SYSTEMS INC.

MARC@EXAMPLE.COM

RECEIVED FEBRUARY 14, 2026

I co-founded Northlane with Amara and left in 2022 on good terms to join a portfolio company. The founding date, the split of responsibilities and the pilot with the Ontario utilities are all as described.

OUTSTANDING

Priya Raghunathan · investor · Halden Ventures · priya@example.com - request sent February 11, 2026, no response yet.

A referee not responding is not a finding about the founder.

SECTION 5 · ASSESSMENT

Founder Market Fit Analysis

Based on self-reported information (resume, LinkedIn, pitch deck), not independent verification. This is AI interpretation, not verified evidence. It contains no scores, ratings, or recommendations.

TRACK RECORD ALIGNMENT AND CAREER TRAJECTORY

Strong founder-market fit. The technical claims, the IP record and the publication record all point to the same domain, and the operating history is in that domain rather than adjacent to it.

BASIS

This block reasons from founder-provided materials only. Where those materials do not evidence something this venture requires, the gap is stated rather than filled.

SECTION 6 · SOCIAL RISK INTELLIGENCE

Social Risk Intelligence

Evifound collects the founder's publicly available content and coverage, attributes it to the founder only when identity confidence is sufficient, and identifies investment-relevant behavioural and reputational signals. The system does not judge personality or ideology, and never infers or scores religion, political affiliation, sexual orientation, race or ethnicity, health, or disability. Ordinary political, religious and lifestyle content is not treated as risk. Every signal is presented with its source, date, source reliability, attribution confidence and corroboration, and an allegation is never presented as a finding.

IDENTITY CONFIDENCE HIGH · 412 ITEMS ANALYSED · 2 SIGNALS

Public activity is consistent with the verified record. Two items are surfaced for review: a founding-date inconsistency in the founder's own statements, and an undeclared advisory position at an adjacent company. Neither is an allegation of misconduct, and no integrity, regulatory or financial-conduct signal was found.

DOMAINS REVIEWED

Integrity - CLEAR

Fraud and deception signals: professional, educational, funding, customer or exit claims that conflict with verified records or with the founder's own statements elsewhere.

Professional Conduct - CLEAR

Publicly documented conduct in a business setting: disputes with partners or investors, professional misconduct, and accusations reported by credible sources.

Public Conduct - CLEAR

Publicly documented abusive behaviour: threats, targeted harassment, intimidation or repeated hostility directed at an identifiable person or organisation. Ordinary strong language is not a signal.

Reputation - CLEAR

Material public controversy: investigative reporting, significant litigation, and repeated negative coverage from independent, identifiable sources.

Regulatory - CLEAR

Regulatory investigations, enforcement actions, warnings and formal findings that are publicly documented.

Consistency - REVIEW

Claims about dates, roles, funding, revenue, customers or exits that do not agree across the founder's own sources and the record.

Conflicts of Interest - REVIEW

Publicly disclosed competing ventures, board and advisory positions, related-party relationships and undisclosed business relationships.

Financial Conduct - CLEAR

Investment and fundraising behaviour: misleading financial claims, undisclosed promotion, investor complaints, and securities-related enforcement.

SIGNALS AND EVIDENCE

Founding year stated as 2018 in one interview, 2019 elsewhere - REVIEW

In a 2024 podcast the founder refers to starting the company in 2018. The registry record, the founder's own submission, LinkedIn and press coverage all state 2019.

Why this is flagged: A date discrepancy in the founder's own public statements. Most likely an informal reference to pre-incorporation work, but it is inconsistent with the record.

STATUS STATUS UNKNOWN · ATTRIBUTION HIGH · SOURCE RELIABILITY MEDIUM · MATERIALITY LOW · 1 INDEPENDENT SOURCE(S) · SINGLE OCCURRENCE

Grid Futures Podcast, episode 88 · August 2, 2024

"We got going in 2018, really just the two of us and a laptop."

<https://example.com/podcast/grid-futures-88>

PROVENANCE - COLLECTOR PODCAST & INTERVIEW SEARCH · RUN not recorded · RETRIEVED 2026-02-14 10:08:00 UTC · SOURCE GRADE NOT RECORDED

IDENTITY MATCH - Full name spoken in the introduction · Company named · Role stated as CTO

Unlisted advisory position at an adjacent company - REVIEW

A public advisory-board page lists the founder as a technical advisor to Meridian Storage Ltd., a company operating in an adjacent segment. The position does not appear in the founder's submission.

Why this is flagged: A publicly disclosed relationship that was not declared. It may be immaterial, but it belongs on the record for an investor to assess.

STATUS STATUS UNKNOWN · ATTRIBUTION HIGH · SOURCE RELIABILITY HIGH · MATERIALITY MEDIUM · 2 INDEPENDENT SOURCE(S) · SINGLE OCCURRENCE

DISCLAIMER AND LIMITATIONS

This report is provided for informational purposes only and is not a guarantee, warranty, or certification of any kind. evifound verifies claims against public records and information provided by the founder at the time of generation. Public records may be incomplete, out of date, or contain errors, and sources may change after this report is produced. A 'corroborated' finding means a source supported the claim at the time of checking - it is not a guarantee the claim is true. An 'unverified' finding means no public source could confirm or deny it - it is not evidence of wrongdoing. evifound does not verify identity documents, security clearance, financial performance, or any non-public information, and makes no representation as to the completeness or accuracy of third-party records. Reference letters are the personal statements of the referees and have not been independently verified. Where this report lists overlapping patents or prior art, those records were surfaced by keyword search of public patent databases and are provided as a prompt for further diligence only: evifound does not assess patent claim scope, validity, freedom to operate, or infringement, patent searching is inherently incomplete, and any assessment of overlap requires review by a qualified patent attorney. Nothing in this report constitutes legal, financial, or investment advice, or a recommendation to invest or not invest. All investment decisions, and all reliance on this report, remain solely with the recipient.
